

Plan Your Route for Safety!

As you and your family prepare to go back to school, plan your walking and cycling routes now to ensure safety and efficiency. Identify location of:

- sidewalks or low volume roads
- crosswalks or traffic signals
- crossing guards
- bike racks at school
- entrance to the school

If possible, talk with friends and neighbors and plan to walk together.

If offered bus service, know where the stop is, your route to the stop and where to safely wait for the bus.
